a. As for claim 9, the prior art of record fails to sufficiently describe or suggest a shipping container tracking system comprising a central database to receive shipping container sensor data from at least one sensor; said central database verifies the content of the first shipping container by processing a national security condition of the first shipping container against a shipping manifest database.

Regarding claims 10 and 19, the prior art of record fails to sufficiently describe or suggest a shipping container tracking system comprising a line of intermediate communications buoys placed at sea at appropriate locations, to at least one of test the container tracking system functionality and to detect anomalies at a safe distance from port facilities. These along with other limitations render the claims allowable over the prior art.
